Making Life Meaningful

www.sarthakwelfarefoundation.org

Our Mission..

“to create a small and sustainable positive change in society by reaching out to every individual, every day and making a meaningful and worthwhile contribution to the positive and progressive human development with collective efforts”

We Believe..

Development is a human process. The energy and aspiration of people who seek development forms the motive force that drives development and people's awareness may decide the direction of development.

Development is the outer realization of latent inner potentials.

***Development is a process of social change,
not merely a set of policies !***

Our Approach

Empowering minds!

Empowerment: *the capacity of individuals, groups or communities to take control of their circumstances, exercise power and achieve their own goals, and the process by which, individually and collectively, they can help themselves and others to maximize the quality of their lives.*

Education: The greatest tool of development

Education is empowerment. The success of any country depends upon education of its citizens. Education that aims at total development of individual's personality. Which also means giving equal chance to every individual for the development of his capacity and equity in opportunity.

Tools of Empowerment!

Teach Discover Develop Empower

Life Skill is a part of our growing up and as essential for every student as any academic skill. Life skills contribute to a cultured and mature growth of an individual. Sarthak focuses on developing these skills with adolescents to help them get a different perceptive and thought process
